

Our Client:

An African Investment Holding Company.

Background:

Our Client wanted to acquire an Airbus A321 with the primary objective of leasing it to its parent airline.

Our Achievements:

- A comprehensive risk assessment and a variety of technical and financial due diligence (aircraft pre-purchase inspection and comprehensive appraisal)
- The technical survey lead to the recommendation for the airline to implement an engine wash programme as the EGT margin was deteriorating at twice the standard rate

Note: This project was not directly performed under The Sharpwings® banner but conducted by the Principals

Airbus A321 Aircraft technical and financial evaluation
