

Our customer was seeking a super mid-size business jet. From mission profile to entry into service, we organised the best package at the most competitive price for our customer.

We successfully managed the nose-to-tail acquisition of a brand new Challenger 300 for a North African holding company. This was completed on-time and within budget.

We fully supported the entry into service of this aircraft, with the selection of a service centre and enrolment programmes, as well as the recruitment of crews.

Note: This project was not directly performed under The Sharpwings® banner but conducted by the Principals
