

Challenger 300

Super mid-size business jet procurement successfully completed on-time and within budget, from mission profile to entry into service.

Managing the nose-to-tail acquisition of a brand new Challenger 300 for a North African holding company, we organised the best package at the most competitive price for the customer.

The Sharpwings team fully supported the entry into service of the aircraft, with the selection of a service centre and enrolment programmes, as well as the recruitment of crews.
