

Twin Otter Disposal Case Study

Appointed in Q3 2024 by a European bank to explore the business case for repairing a heavily damaged Twin Otter and manage its disposal

Our turn-key package included (i) **aircraft full appraisal**, (ii) seeking and **verifying repair quotations**, (iii) drawing up **disposal strategies** and (iv) **aircraft remarketing**.

Our **proactive** and preventive **approach** to asset management **minimised pitfalls** and enabled the financier to make informed risk management decisions.

Aircraft sold in Q4 2025, **maximising its selling potential**, as is where is: our insightful knowledge of the market enabled us to **determine the right target sale price** and allowed us to **align buyer's and seller's expectations**.
